LEGACY PUMPER

Safe and Economical Design

The KME Legacy Pumper is, by design, a program type unit with equipment storage capabilities to meet the needs of a fully functional pumper and your emergency response requirements. Available on the KME Panther Custom Chassis and most commercial chassis, the Legacy pumper offers 29" deep compartments, side or top mount configurations and a diverse option selection to optimize each unit at an affordable price.

FEATURES

- Premium Features at an Affordable Price
- Maximum Equipment Storage Capacity
- Ergonomic Pump Panel Area, Either Side or Top Mount
- Side Mount Offers Lowered Pre-connects
- Diverse Option Selections Available
- Vertical Ladder Storage for Safe Removal of Ladders

EASY ACCESS

The Legacy Pumper design features vertical ladder storage for safe ladder access from the rear of the unit. The body fenders accommodate six air bottles with optional storage available.

PREMIUM FEATURES

Every Legacy body comes standard with 29" deep compartments and stainless steel plumbing, in addition to all units being foam system ready for installation in the future.

MULTIPLE CONFIGURATIONS

Available on both KME custom and commercial chassis, Legacy pumpers can be configured in sidemount or top mount panel configurations.
